MATERIALS CHARACTERIZATION 27:297 (1991)
1044-5803/91/$3.50

SUBJECT INDEX TO VOLUMES 26 AND 27

Characterization Techniques
- Characterization and Integration of Polymeric and Microdiffraction Specimens Using a Two-dimensional Position-sensitive Detector, 27:223
- Computer-Aided Characterization of Solidification Processes, 27:269
- Computer-Aided Microstructural Analysis of Specialty Steels, 27:241
- Computer-Aided Prediction and Analysis of Electron and X-Ray Diffraction Patterns, 27:213
- Computer-Aided Surface Analysis Techniques, 27:199
- Effect of a Surface Layer on the Investigation of Au-Fe Alloys by Transmission Electron Microscopy, 26:85
- Etching and Image Analysis of Prior Austenite Grain Boundaries in Hardened Steels, 27:53
- Identification of the Crystal Structure of Fine Precipitates Using Stereographic Electron Diffraction Techniques, 27:1
- Metallographic Preparation Technique for Electrodeposited Iron-Zinc Alloy Coatings on Steel, 26:45
- New Insights on Single-Crystal Orientation by the Diffractometer Method, 27:27
- Observation of Retained Austenite by Secondary Electron Imaging in a Scanning Transmission Electron Microscope, 26:53
- Optical Metallography with a Laser Beam: Orientation Dependence of the Dispersed Intensity, 26:137
- Stereographic Technique for Quantitative Analysis for Cleavage Plane Orientation, 26:9
- The Measurement of Grain Boundary Particle Distributions in Aged Al-Zn-Mg Alloys, 27:147
- Titanium Prior-Beta Grain Volume Distribution by Quantitative Serial Sectioning Techniques, 26:63

Crystallography
- Identification of the Crystal Structure of Fine Precipitates Using Stereographic Electron Diffraction Techniques, 27:1
- New Insights on Single-Crystal Orientation by the Diffractometer Method, 27:27

Failure Analysis
- Analysis of Preservice Cracking in a Large Bridge Structure, 26:225
- Failure of Orthopedic Implants: Three Case Histories, 26:201
- Fracture Mechanisms in a Series of Locomotive Axle Failures, 26:235
- Hydrogen-Assisted Cracking, 26:253
- Mechanisms of Intergranular Fracture in Alloy Steels, 26:269
- Metallography of Environment Sensitive Fracture, 26:303
- Microstructural Characterization of Failures, 26:211

Mathematical Analysis, Modeling
- A Probabilistic Approach To Estimate Particle Size Distribution Without Shape Assumption. Part I: Theory and Testing on Spherical Particles, 27:35
- Model for the Dependence of the Dihedral Angles Distribution on the Distribution of the Energy of Grain Boundaries in Polycrystals, 26:57
- Spatial Correlations in Metal Structures and Their Analysis, 26:167
- Voronoi Statistics of Hard-Core Systems, 26:73

Mechanical Behavior, Wear and Erosion
- Computer-Aided Fractal Analysis of Rubber Wear Surfaces, 27:231
- Microstructural Defects and Mechanical Properties of High-Performance Ceramics, 26:289
- Room Temperature Fracture of FeAl and NiAl, 27:167
- Structural Instability and Damping Properties of Heterophase Materials Based on Aluminium Alloys, 26:177

Microstructural Characterization, Composites
- Characterization of Microstructures Contributing to Degradation of Superconductivity in Explosively Fabricated High Tc Superconductors, 27:91
- Characterization of Tin Dioxide Interphase Coating in Alumina/Glass Composite, 27:19
- The Role of Surface Treatments and Magnesium Additions on the Dispersoid/Matrix Interface in Cast Al-Si-Mg-15wt.% SiC_p Composites, 27:11

Microstructural Characterization, Metals
- An Aspect of Intragranular Widmanstätten γ Formation in Al-18% Ag, 27:111
- Characterization of Inertia-friction Welds in a High-temperature RS/PM Al-8.5Fe-1.3V-1.7Si Alloy (AA-8009), 26:123

MATERIALS CHARACTERIZATION 27:299–300 (1991)
1044-5803/91/$3.50

Computer-Aided Microstructural Analysis of Specialty Steels, 27:241
Copper Embrittlement by Silver Brazing Alloys, 26:17
Determination of the Microstructure and Alloy Element Distribution in Experimental Duplex Stainless Steels, 26:155
Initiation of Twins at Grain Boundaries During Low Temperature Fast Compression of Mild Steel, 27:119
Metallographic Structure of Bainitic Compacted Graphite Cast Irons, 26:143
Microstructural Studies of a Roll-bonded Laminated Ultrahigh Carbon Steel Bar, 27:141
Microstructure of As-Cast $Al_{69}Ti_{23}Ni_8$, 27:45
Microstructure of As-Cast NiTi Alloy, 27:133
Phase Characterization in Two Centrifugally Cast HK Stainless Steel Tubes, 26:1
Phase Identification in Aged Au-Fe Alloys Using Transmission Electron Microscopy, 26:93
Role of Nb in Modifying the Microstructure of Heat-resistant Cast HP Steel, 26:193
TEM Study of β and Martensite in Cu-Al-Mn Shape Memory Alloys, 26:23
The Measurement of Grain Boundary Particle Distributions in Aged Al-Zn-Mg Alloys, 27:147
Transmission Electron Microscope Observations of the Dislocation Substructures Induced by Cyclic Deformation of the Ferritic Fe-25Cr-(2-4)Al and Fe-19Cr-4Ni-2Al Alloys, 26:109
Two Plateaux for Palladium Hydride and the Effect of Helium from Tritium Decay on the Desorption Plateau Pressure for Palladium Tritide, 27:157

Microstructural Characterization, Nonmetals
Computers—The Key to Reliable Ceramic Materials and Components, 27:281
Electron Microscopy of High Tc Superconductors, 27:59
Microstructural Defects and Mechanical Properties of High-Performance Ceramics, 26:289

Oxidation, Corrosion, Environmental Interactions
A Coatings and High Temperature Corrosion Computerized Database, 27:261
Electron Microscope and Raman Characterization of the Surface Oxides Formed on the Fe-Cr Alloys at 400–850°C, 26:29
Influence of Microstructure on the Intergranular Corrosion Resistance of 24.4 Cr/7.4 Ni Duplex Stainless Steel, 26:149
Oxidation Characteristics of Some Fe-40Cr-Pd and Fe-40Cr-Ru Alloys in Air at 900°C, 27:175

Quantitative Analysis
Computer-Aided Fractal Analysis of Rubber Wear Surfaces, 27:231
Computer-Aided Quantitative Microscopy, 27:185
Etching and Image Analysis of Prior Austenite Grain Boundaries in Hardened Steels, 27:53
Physicochemical Method for Determining the Total Volume Fraction of Carbides in Annealed High-speed Steels, 27:127

Book Reviews
Hydrothermal Reactions for Materials Science and Engineering—An Overview of Research in Japan, 26:61
Structure of Metals Through Optical Microscopy, 27:117
